## Flight Path Design Principles Released

Good afternoon,

I am writing to you as a community member who is registered with our Noise Complaints and Information Service.

I am pleased to provide you with an update on Airservices Flight Path Design Principles.

The Flight Path Design Principles are effective from 1 October 2020 and will apply to all flight path changes from that date.

This follows a national consultation between 13 January 2020 to 9 March 2020 and a public comment period between 10 June 2020 and 8 July 2020.

We would like to thank everyone who participated in the consultation and the public comment period by providing comments and submissions.

During the public comment period over 4,000 people visited the project page and we received a total of 143 comments, including a number of detailed submissions.

We have developed a **Consideration of Feedback** report which summarises the feedback we received and describes how we incorporated feedback into the final document.

The **Consideration of Feedback** report and the **Flight Path Design Principles** document are now available at Engage Airservices <https://engage.airservicesaustralia.com/flight-path-design-principles>.

Kind Regards,

A handwritten signature in blue ink, appearing to read "Fiona Lawton".

**Fiona Lawton**
