Flag Status: Flagged

Good afternoon Greg,

Thank you for your enquiry.

Please be advised that Noosa Council no longer maintains a separate register of confidential sessions. Instead, details regarding the occurrence and subject matter of each confidential session are recorded and made publicly available through our Council meeting agendas and minutes. This approach ensures transparency and accountability in line with legislative requirements.

All Council meeting agendas and minutes, including overviews of confidential items, are accessible via our website. These documents contain relevant information consistent with that previously recorded in the standalone register.

I trust this information assists with your enquiry. Please don't hesitate to reach out if you require any further clarification.

Kind regards,

Jonci

Hi Frank

I hope this finds you well.

You may recall this email conversation from February 2023. We were pleased you actioned our request at the time.

Noosa's publication of the register was very useful in OSCAR's lobbying of the SCRC to do the same which they have now done following Noosa's format for their register.

In an attempt to update our web page relating to confidential items, I cannot now find the Noosa Register via the link on our website (Page not found error) and my attempts to find it by searching the Noosa website have proved fruitless!

Are you able to shed any light on this?

All the best Greg

Greg Smith

Vice President, OSCAR
